Hello! I'm MJ, a Software Engineer eager for new challenges and driven by a passion for coding, problem-solving, and continuous learning. With a background in cognitive science linguistics and six years of experience in the hospitality industry as a barista, I bring a unique blend of technical expertise and strong interpersonal skills. I thrive on overcoming challenges and am excited to contribute to a dynamic and collaborative team. Enthusiastic about working on innovative projects that push technological boundaries, I'm keen to gain industry experience, continue learning, and make a meaningful impact in software development. When I'm not coding, you might find me strategising my next move in a board game.

Technical Skills

Language
- JavaScript(ES6)
- HTML
- CSS

Library
- React
- Redux Toolkit
- React Query

Database
- MongoDB
- Postgres

Framework
- Express.js
- Jest

Tool
- Visual Studio Code
- MongoDB Compass

- Insomnia
- Docker
- Postico

Others
- Node.js
- Git & GitHub

Project Experience

Rent React - Rental Property Search Application   Group Project
- React.js
- Google OAuth
- Redux Toolkit
- React Query
- Bootstrap
- Google Maps API

- Integrated Apartments.com API for real-time data and Google OAuth for secure authentication.
- Used React Query for data fetching and Redux Toolkit for state management.details, and optimising the user experience with custom hooks and smooth loading.
- Developed the Property Detail Page with a responsive UI, custom hooks, and smooth loading for a better user experience.

Netflix - Movie Streaming Application   Individual project
- React.js
- React Query
- Bootstrap
- APIs

- Utilised the TMDB API to dynamically fetch and display movie data, including genres, recommendations, reviews, popular movies, and top-rated movies.
- Implemented custom hooks with React Query for efficient data fetching and state management.
- Ensured a seamless user experience with automatic updates and optimised performance with responsive design.

The reservationizr - Restaurant Booking System   Individual project
- React
- Jest
- Express
- Supertest
- MongoDB
- Insomnia
- Mongoose
- CSS
- Docker

- Developed using React (frontend) and Express (backend), with MongoDB and Mongoose for data management.
- Implemented RESTful APIs for CRUD operations and utilised Docker for consistent database environment management.
- Integrated Auth0 for secure user authentication and authorisation.

• Conducted testing with Jest, Supertest, and Insomnia.

Skill Summary

Teamwork

When I joined Stolen Summer, they just started, and the setup wasn't optimal. My colleague and I leveraged our expertise gained from previous experiences to make strategic changes to the recipe, optimise workflow processes, and promote a collaborative team environment. These adjustments resulted in increased profitability, surpassing our initial goals and generating more than double the previous revenue.

Adaptability

Recognising the importance of enhancing my coffee-making skills, I took proactive steps to address customer feedback. By seeking guidance from experienced colleagues, attending workshops, and participating in training sessions, I significantly improved my coffee-making abilities. This dedication not only led to heightened customer satisfaction but also played a pivotal role in the cafe's success. The cafe experienced a remarkable surge in sales, exceeding previous figures by more than twice. Additionally, to meet the increased demand and ensure smooth operations, the cafe expanded its team by hiring staff, contributing to the overall growth and success of the establishment. My commitment to adaptability not only enhanced my personal skills but also positively impacted the cafe's performance and customer experience.

Problem-solving

With six years of experience as a barista, I have honed my problem-solving skills in fast-paced environments. Notable achievements include effectively managing high volumes of orders, resolving customer complaints, and troubleshooting technical issues with coffee equipment. My analytical approach enables me to identify root causes swiftly, implementing practical solutions that ensure seamless operations and customer satisfaction.

Work Experience

Stolen Summer - Barista	2019 - 2022
Altezano Brothers - Barista	2018 - 2019

- Team-work
- Problem-Solving
- Self-development
- Adaptability
- Customer service
- Communication
- Leadership
- Time-management

Education

Diploma in Web Development and Design	2023
Whitecliffe, NZ	
Web Development and Design	2023
Developers institute, NZ	
Bachelor of Cognitive Science Linguistics	2009 - 2022
Hankuk University of Foreign Studies, Korea	

- *Thesis Award:* receive recognition as one of the best graduation theses
